SQN9..., rear (covers fitted)

# **Damper Actuators**

**SQN9...** 

Reversible electromotoric actuators for air dampers and valves of oil or gas burners of small to medium capacity.

The SQN9... and this Data Sheet are intended for use by OEMs which integrate the damper actuators in their products!

## Use and features

The SQN9... actuators are designed for driving gas or air dampers of oil or gas burners of small to medium capacity, for load-dependent control of the fuel and combustion air volume:

- In connection with P-PI or PID controllers, such as the RWF40...
- Directly via the different types of burner controls, such as LOA..., LMO..., LMG..., LFL...
- In connection with 1- or 2-wire control or 3-position controllers

Holding torque: 0.8...2.4 Nm

Running time: 4...24 s

Direction of rotation: SQN90... counterclockwise

SQN91... clockwise

SQN9...
 Fixing holes and cable entries

Equivalent to actuators of the same category made by Conectron and Berger

To avoid injury to persons, damage to property or the environment, the following warning notes should be observed!

#### Do not open, interfere with or modify the actuators!

- All activities (mounting, installation and service work, etc.) must be performed by qualified staff
- Before making wiring changes in the connection area of the actuator, completely isolate the equipment from the mains supply (all-polar disconnection)
- Ensure protection against electric shock hazard by providing adequate protection for the connection terminals and by securing the cover
- Each time work has been carried out (mounting, installation, service work, etc.), check to ensure that wiring is in an orderly state and that parameters are correctly
- Fall or shock can adversely affect the safety functions. Such actuators must not be put into operation even if they do not exhibit any damage

#### Mounting notes

Ensure that the relevant national safety regulations are complied with

#### Standards and certificates

Conformity to EEC directives

- Electromagnetic compatibility EMC (immunity)
- Low-voltage directive

89 / 336 / EEC 73 / 23 / EEC

ISO 9001: 2000 Cert. 00739

ISO 14001: 2004 Cert. 38233

#### **Disposal notes**

The actuator contains electrical and electronic components and must not be disposed of together with household waste.

Local and currently valid legislation must be observed.

# Mechanical design

# Housing

- Made of impact-proof and heat-resistant plastic
- The housing accommodates:
  - The reversible synchronous motor with the gear train, which can be disengaged
  - The camshaft of the control section
  - The relays, depending on the type of actuator
  - The switches, connected to the terminals via the printed circuit board
- Color: black

Drive motor

- Reversible and locking-proof synchronous motor

Coupling

 Drive shaft can be manually disengaged from the gear train and motor (by pressing screw «K»)

- Automatic reengagement

Adjustment of

- By means of adjustable cams

switching points

- Scales beside the cams indicate the angle of the switching points
- Cams can be adjusted manually or with the enclosed hook-spanner or a similar tool

Position indication

Via scale at the end of the camshaft and index on the front

Electrical connections

Refer to «Technical data»

Geartrain

Maintenance-free

Drive shaft

Made of sinter metal

- Ready fitted to the front of the gear train

Mounting and fixing

- Rear of the gear train is used as the mounting surface
- Actuator is secured via through-holes
- Housing side with recessed fixing nuts M4

### Actuators SQN90... / counterclockwise rotation 1)

Diagram	Function	Running time	Nominal /	Mains voltage / r	nains frequency
no.	sequence	at 50 Hz <sup>2)</sup>	starting torque	AC 230 V 4)	AC 115 V 3)
	no.	for 90°		+10 % / -15 %	+10 % / -15 %
		S	Nm	5060 Hz	5060 Hz
S3	F2, F3	12	2.4	SQN90.204A2799	
S2	F2, F3	12	2.4	SQN90.220A2799	
S4	F1	12	2.4	SQN90.240B2799	
S5	F4	10	2	SQN90.350A2799	

# Actuators SQN91... / clockwise rotation 1)

Diagram	Function	Running time	Nominal /	Mains voltage / r	nains frequency
no.	sequence	at 50 Hz 2)	starting torque	AC 230 V 4)	AC 115 V 3)
	no.	for 90°		+10 % / -15 %	+10 % / -15 %
		S	Nm	5060 Hz	5060 Hz
S4	F1	4	0.8	SQN91.140B2799	SQN91.140B1799
S2	F2, F3	12	0.8	SQN91.220A2799	

Other types of actuators are available on request.

### Legend

- 1) At 60 Hz, running times are about 20 % shorter
- 2) AC 115 V +10 % / -15 % possible, but in the case of undervoltage, torque is reduced by about 20 %
- 3) AC 230 V +10 % / -15 % possible, but in the case of undervoltage, torque is reduced by about 20 %
- 4) When facing the drive shaft and when control voltage is supplied to end switch I

### **Ordering**

When ordering, please give type reference according to «Type summary».

General	actuator	data
---------	----------	------

Λ	Ct	112	to	r
м	CLI	ua	LU	ч

Mains voltage	AC 220 V -15 %AC 240 V +10 %

Storage	DIN EN 60 721-3-1
Climatic conditions	class 1K3
Mechanical conditions	class 1M2
Temperature range	-20+60 °C
Humidity	< 95 % r.h.
Transport	DIN EN 60 721-3-2
Climatic conditions	class 2K2
Mechanical conditions	class 2M2
Temperature range	-50+60 °C
Humidity	< 95 % r.h.
Operation	DIN EN 60 721-3-3
Climatic conditions	class 3K5
Mechanical conditions	class 3M2
Temperature range	-20+60 °C
Humidity	< 95 % r.h.

# Condensation, formation of ice and ingress of water are not permitted!

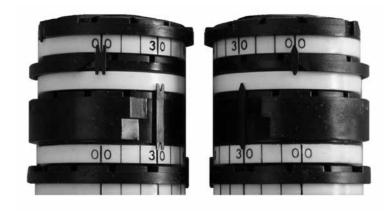

#### **Function**

A synchronous motor drives the drive shaft and the camshaft via a gear train. The camshaft actuates the end and auxiliary switches. Using the associated cam, the switching position of each end and auxiliary switch can be adjusted within the working range. Some of the actuator versions are equipped with electronic modules, which perform auxiliary functions in connection with the end and auxiliary switches, or with external devices, such as controllers.

The camshaft has 2 pointers for indicating the direction of rotation.

The pointers are assigned as follows:

- Double pointer  $\rightarrow$  SQN90...
- Single pointer  $\rightarrow$  SQN91...

The following connection diagrams show the start position as supplied:

- End switch position II «Closed»
- Dead
